

ENVIRONMENTAL POLICY STATEMENT

Lilleker Bros. Ltd is committed to protecting and continuously improving the environment. In carrying out its activities, we will strive to provide our employees, clients, and the public at large with a good quality of life both now and in the future.

The work performed by us, in common with every other organisation impacts upon the environment. In carrying out our activities and delivering our services we aim to comply with all relevant regulatory and legislative requirements and any other such requirements to which the company subscribes regarding the environment and will follow the principles of sustainability in striving to minimise our impact on the environment.

This policy statement sets out our framework to enable us to deliver our aims relating to improving our own environmental performance within our activities and their impact on the wider community. We will through our own activities seek to achieve our environmental objectives by:

- Assessing and minimising any adverse environmental impacts resulting from our own activities
- Encouraging others in the community to do likewise

In all our activities, we will seek to.

Reduce environmental damage and conserve resources by.

- Promoting conservation and sustainable use of natural resources
- Avoiding waste and encouraging the re-use and recycling of resources and using recycled materials wherever practicable
- Encouraging the purchase of material and services which cause least harm to the environment
- Reducing energy consumption in our own buildings, plant, and equipment, promoting responsible energy management and reduction of carbon dioxide emissions

Safeguard the built environment and cultural heritage by.

- Safeguarding conservation areas and preserving the country's historic and architectural heritage
- Promoting good layout and design in new and refurbished developments consistent with environmental protection, energy management and the character of the local area

Prevent pollution by.

- Planning, reduction and wherever possible eliminating noise and light pollution
- Protecting the environment from the dangers incurred through the use and disposal of toxic and unsafe products

To achieve these aims we will.

- Maintain and continually improve our integrated OHSE Management System based upon the requirements of ISO14001:2015.
- Encourage staff awareness of and responsibility for the environment
- Promote co-ordination with our clients and their representatives in all matters pertaining to the protection of the environment
- Encourage sub-contractors and suppliers to apply equivalent or better standards than our own
